

The SFETC doesn't just make sense, it makes millions

Each direct job in the film and television industry accounts for the creation of an additional 1.96 jobs within the province in related industries.

A 10 million dollar production generates:

- 2500 hotel room nights and accommodation rentals;
- 50,000 catered meals;
- \$125,000 in vehicle rentals;
- \$1 million in equipment rentals;
- a skilled, well-compensated labour force;
- and countless purchases at cell phone companies, lumber yards, paint shops, taxis, limousines, restaurants, nightclubs, dry cleaning companies and all other service and hospitality industries
